INDUSTRY EXPERTISE

- Telecommunication
- Finance
- Customer Experience

TECHNICAL SPECIALIZATIONS

- AngularJS
- Angular2
- Node JS
- Express JS
- JavaScript
- Mongo DB
- Core Java
- Basic knowledge of C++
- CSS3
- HTML
- Bootstrap
- PL/SQL
- VERSION CONTROL (GitHub and BitBucket)
- Clear Quest(IBM)
- Clear Case (IBM)

Associate Software Developer
CGI – Bangalore

Project: Advantage 4.0 (Oct 2018 – Jan 2019)

Client: New York City

Role: MEAN Stack Developer

Advantage has two service portals, vendor self service and Financial Management Service (FMS). Vendor self service (VSS) portal contains Information about vendor/customer where they can login and update their personal and Tax information. This portal also contains the Information of vendors which bids for government projects. Financial Management service portal handles by government agents where vendors details from VSS portal get approve or reject.

- Worked on both front end and backend development. (Client Side implementation – Angular 2, Server side implementation – Node and Express JS and Mongo Database).
- Dealt with Data Binding, Routing, Directives, Component Services in Angular 2.
- Worked on Rest APIs to send all type of Http requests – GET, POST, PUT, and DELETE.
- Dealt with CRUD operations on Mongo DB and it connectivity.
- Used GitHub as Version Control System.

Project: Advantage (Oct 2017 – Sept 2018)

Client: West Virginia and State of Maine

Role : Junior Java Developer

Advantage has two service portals, vendor self service (VSS) and Financial Management Service (FMS). Vendor self service (VSS) portal contains Information about vendor/customer where they can login and update their personal and Tax information. This portal also contains the Information of vendors which bids for government projects. Financial Management service portal handles by government agents where vendors details from VSS portal get approve or reject.

- Worked on Core Java to remove the Application defects and find Root Cause.
 - Used Versata Tool for compiling and creating xml and java files. It also creates attribute/variable in java and relate same column name in Oracle database as of attribute's name.
 - Used ClearCase (IBM) and JIRA tools to log entries of defects and enhancement tasks.
 - Used ClearQuest (IBM) as Version Control to Check-in and Check-out modified files.
-

Project: British Telecom (Nov 2016 – Sept 2017)

Client: UK

Role: Support Engineer

British Telecom deals with telecommunication domain. It has operations in around 180 countries and is the largest provider of fixed-line, broadband and mobile services in the UK, and also provides subscription television. It's portal manages the order inflow of broadband and telecom services and to do an RCA on each order journey .Hence do the reporting of stuck orders and close it before it reaches the SLA .

- Used JIRA (Ticket management tool) – Managing issues, tickets, workflow progress and reporting features.
- Used SQL - To check and progress the order status and to retrieve data helpful in the daily reporting tasks.
- Used UNIX basic commands to verify the log files to find the exceptions ,request and responses.
- Used Intalio (Business process Management tool) to verify the log files.
- Pulse tool to retrieve the status of order received from middleware system.
